

WAMIQ SIDDIQUI

DevOps / SysOps ENGINEER

Karachi, Pakistan | +92-313-2695966 | sidwamiq@gmail.com | [Linkedin](#)

PROFESSIONAL SUMMARY

DevOps and SysOps Engineer with nearly 3 years of experience running AWS and Azure infrastructure for enterprise and FinTech environments. Delivered 99.99% uptime for 10,000+ concurrent users, reduced infrastructure costs by 22%, and cut deployment times by 60% through CI/CD automation and infrastructure as code. Hands-on with Kubernetes, Terraform, Cloudflare DNS, and SendGrid SMTP. Works independently, owns operations end to end, and communicates clearly with technical and non-technical stakeholders. Security-minded (ISO 27001, NIST) with a focus on zero-downtime releases.

TECHNICAL SKILLS

Cloud (AWS): EC2, EKS, RDS, S3, Lambda, VPC, IAM, CloudWatch, CloudFormation, Auto Scaling, Load Balancing, Amazon SES

Cloud (Azure): Azure DevOps, AKS, App Services, Function Apps, Service Bus, Key Vault, Azure Monitor, Application Insights, RBAC, ARM Templates

IaC & CI/CD: Terraform (reusable modules), CloudFormation, Azure DevOps Pipelines, GitHub Actions, GitLab CI, Jenkins, AWS CodePipeline, ArgoCD

Containers: Docker, Kubernetes (EKS / AKS), Helm, GitOps

Monitoring: Prometheus, Grafana, ELK Stack, CloudWatch, Application Insights

Security: DevSecOps, IAM, RBAC, Key Vault, ISO 27001, NIST, Trivy, SonarQube, OWASP ZAP

DNS & Email: Cloudflare (CDN, caching, DNS, security, page rules), SSL/TLS management, SendGrid SMTP, transactional email pipelines

Scripting: Python, Bash, PowerShell, YAML

PROFESSIONAL EXPERIENCE

Azure DevOps / SysOps Engineer

Sep 2025 - Present

Mahaana Wealth (FinTech)

Karachi, Pakistan

- Operate AWS and Azure environments for a regulated FinTech platform across development, staging, pre-production, and production using zero-downtime release strategies.
- Manage CI/CD for 30+ production services (.NET, Node.js, Python) with multi-stage YAML pipelines and approval gates, reducing deployment lead time by 40%.
- Automate provisioning with Terraform, cutting manual configuration errors by 95% and providing full audit trails for regulatory compliance.
- Replicated the full infrastructure into a second Azure region (Southeast Asia) with Terraform, producing an identical environment.
- Hardened services with firewall rules, IP restrictions, Azure Key Vault, RBAC, and IAM policies: no secrets in code and HTTPS enforced end to end.
- Manage Azure Service Bus (queues and topics) for event-driven microservice communication; build and maintain backend APIs.
- Act as technical point of contact for third-party integrations and operational escalations across development, QA, and product teams.

Junior DevOps Engineer

Sep 2024 - Oct 2025

Al Nafi International College

Karachi, Pakistan

- Built and ran AWS and Azure infrastructure at 99.99% uptime for 10,000+ concurrent users using auto-scaling, load balancing, and Amazon EKS.
- Deployed containerized applications with Docker, EKS, and Helm, achieving 95% deployment consistency and 60% faster deployments.
- Migrated services from EC2 to Amazon EKS and built CI/CD with AWS CodePipeline and an ArgoCD GitOps flow for canary and blue-green releases, reducing production incidents by 40% and enabling rollback in under 5 minutes.
- Automated infrastructure with Terraform and CloudFormation across VPC, EC2, EKS, RDS, S3, and Lambda, eliminating configuration drift.
- Integrated Trivy, SonarQube, and OWASP ZAP into CI/CD pipelines, intercepting 99.5% of vulnerabilities before production release.
- Led cost optimization (rightsizing, reserved instances, utilization analysis), achieving a 22% reduction while meeting SLA targets.
- Distributed content through Cloudflare CDN and caching; managed DNS, SSL/TLS, and redirections.
- Tuned SMTP email delivery and integrated CRM, payment, and external API platforms.

Junior SysOps Engineer

Jan 2024 - Sep 2024

Al Nafi Cloud

Karachi, Pakistan

- Managed EC2, EKS, RDS, S3, Lambda, and VPC; administered IAM, RBAC, least-privilege access, and bastion hosts.
- Monitored systems with Prometheus, Grafana, and CloudWatch; delivered weekly performance and capacity reports.
- Supported disaster recovery and backup planning; took part in on-call response, RCA, and post-incident reviews.

KEY ACHIEVEMENTS

- Deployed 47 Azure infrastructure environments with Terraform in a single month.
- Reduced production incidents by 92% through automated provisioning, and cut per-deployment time by 3 hours with reusable pipeline templates.
- Pioneered a zero-trust deployment architecture: no public IPs on applications, no public database access, secrets never stored in files.
- Established Terraform module patterns adopted across multiple teams, reducing duplication and speeding up new environment setup.

EDUCATION

Diploma in AiOps | EduQual Level 6 (Bachelor's equivalent)

Al Nafi International College

2023 - 2025

Karachi, Pakistan

F.Sc. Pre-Engineering

Govt. Degree College North Karachi

2019 - 2021

Karachi, Pakistan
