

Wamiq Siddiqui

Cloud & DevOps Engineer

Karachi, Pakistan | +92 313 2695966 | sidwamiq@gmail.com | [linkedin.com/in/wamiq-siddiqui-sid-412372236](https://www.linkedin.com/in/wamiq-siddiqui-sid-412372236)

Summary

Cloud & DevOps Engineer with nearly 3 years of experience building and running AWS and Azure infrastructure in production. Delivered 99.99% uptime for 10,000+ concurrent users, reduced infrastructure cost by 22% and cut deployment times by 60% through CI/CD automation and infrastructure as code. Hands-on with Azure App Service, AKS and EKS, Terraform, Cloudflare and SendGrid. Works independently, owns operations end to end, and communicates clearly with technical and non-technical stakeholders. Security-minded (ISO 27001, NIST) with a focus on zero-downtime releases.

Technical skills

Azure	Azure DevOps, AKS, App Services, Function Apps, Service Bus, Key Vault, Azure Monitor, Application Insights, RBAC, ARM templates
AWS	EC2, EKS, RDS, S3, Lambda, VPC, IAM, CloudWatch, CloudFormation, Auto Scaling, Load Balancing, SES
IaC and CI/CD	Terraform (reusable modules), CloudFormation, Azure Pipelines, GitHub Actions, GitLab CI, Jenkins, AWS CodePipeline, ArgoCD
Containers	Docker, Kubernetes (EKS / AKS), Helm, GitOps
Monitoring	Prometheus, Grafana, ELK Stack, CloudWatch, Application Insights
Security	DevSecOps, IAM, RBAC, Key Vault, ISO 27001, NIST, Trivy, SonarQube, OWASP ZAP
DNS and email	Cloudflare (CDN, caching, DNS, page rules), SSL/TLS, SendGrid SMTP, transactional email
Scripting	Python, Bash, PowerShell, YAML

Experience

Cloud & DevOps Engineer	Sep 2025 to present
Current role, Karachi	

- Run Azure and AWS environments across development, staging, pre-production and production with zero-downtime releases.
- Own CI/CD for 30+ production services (.NET, Node.js, Python) on multi-stage YAML pipelines with approval gates, cutting deployment lead time by 40%.
- Provision with Terraform, reducing manual configuration errors by 95% with a full audit trail; replicated the full infrastructure into a second Azure region.
- Hardened services with firewall rules, IP restrictions, Key Vault, RBAC and IAM: no secrets in code, HTTPS end to end.
- Run Azure Service Bus for event-driven microservices and build backend APIs; point of contact for integrations and escalations.

Junior DevOps Engineer
AI Nafi International College, Karachi

Sep 2024 to Oct 2025

- Built and ran AWS and Azure infrastructure at 99.99% uptime for 10,000+ concurrent users with auto scaling, load balancing and Amazon EKS.
- Deployed containers with Docker, EKS and Helm, achieving 95% deployment consistency and 60% faster deployments.
- Migrated EC2 services to EKS with CodePipeline and ArgoCD GitOps (canary, blue-green), cutting incidents by 40% and rollback to under 5 minutes.
- Automated VPC, EC2, EKS, RDS, S3 and Lambda with Terraform and CloudFormation; added Trivy, SonarQube and OWASP ZAP, catching 99.5% of vulnerabilities pre-release.
- Led cost optimisation (rightsizing, reserved instances) for a 22% reduction; managed Cloudflare CDN, DNS, SSL/TLS and SMTP delivery.

Junior SysOps Engineer
AI Nafi Cloud, Karachi

Jan 2024 to Sep 2024

- Managed EC2, EKS, RDS, S3, Lambda and VPC; administered IAM, RBAC, least-privilege access and bastion hosts.
- Monitored with Prometheus, Grafana and CloudWatch; supported disaster recovery, on-call, root-cause analysis and post-incident reviews.

Key achievements

- Deployed 47 Azure infrastructure environments with Terraform in a single month.
- Reduced production incidents by 92% through automated provisioning; cut 3 hours from every deployment with reusable pipeline templates.
- Built a zero-trust deployment architecture: no public IPs on applications, no public database access, secrets never stored in files.
- Established Terraform module patterns adopted across multiple teams.

Education

Diploma in AIOps, EduQual Level 6 (bachelor's equivalent), AI Nafi International College
F.Sc. Pre-Engineering, Govt. Degree College North Karachi

2023 to 2025
2019 to 2021
